

Table of Contents

| | | |
|--------------------------|--|--------|
| Section 1 | Construction Layout and Measurements | |
| Chapter 1 | Introduction | 1 - 1 |
| Review | * Review definitions of shapes, etc. | 1 - 1 |
| Definitions & | * Sample problems using shapes, etc | 1 - 4 |
| Problems | * Accuracy of calculations | 1 - 6 |
| | * Rise & Chord Table | 1 - 8 |
| Chapter 2 | Introduction | 2 - 1 |
| Use & Care of | * Definitions | 2 - 1 |
| Level | * The Two Peg Test | 2 - 5 |
| | * Level Notes | 2 - 7 |
| | * Level Set-Up Procedure | 2 - 11 |
| | * Care & Cleaning of the Level | 2 - 15 |
| | * Profile Leveling | 2 - 15 |
| | * Description of Self-Leveling Level | 2 - 19 |
| Chapter 3 | Introduction | 3 - 1 |
| The Field Book | * Points to Consider While Note Keeping | 3 - 1 |
| | * Summary | 3 - 2 |
| Chapter 4 | Introduction | 4 - 1 |
| Discussion of | * Equipment | 4 - 2 |
| Distance | * Procedure: Taping over smooth, level ground | 4 - 4 |
| Measurements | * Procedure: Taping over hilly, sloping ground | 4 - 6 |
| | * Sources of Error in Taping | 4 - 11 |
| Chapter 5 | Introduction | 5 - 1 |
| Cross Sections | * Side Slopes | 5 - 2 |
| | * Field Notes | 5 - 2 |
| | Examples | |
| | Borrow Pit "A", Original Sections | 5 - 3 |
| | Borrow Pit "A", Final Sections | 5 - 4 |
| | * Original Cross Sections | 5 - 5 |
| | * Profiles | 5 - 5 |
| | * Vertical Section | 5 - 6 |
| | * Zero Section | 5 - 6 |
| | * Split Section | 5 - 6 |
| | * Match Lines | 5 - 7 |
| | * Interpolation | 5 - 8 |

| | | |
|--------------------------|--|---------|
| | * Earthwork Quantities | 5 – 9 |
| | * Average End Area Method | 5 – 10 |
| Chapter 6 | Introduction | 6 – 1 |
| Slope Stakes | * Definitions | 6 – 1 |
| | * Typical Section | 6 – 2 |
| | * Office Procedure | 6 – 3 |
| | * Field Procedure | 6 – 3 |
| | * Example | 6 – 4 |
| | * Slope Stake Notes | 6 – 5 |
| Chapter 7 | Introduction | 7 – 1 |
| Radius Layout | * Layouts for Square Drives | 7 – 1 |
| | * Layouts for Skew Drives | 7 – 1 |
| | * Radius layout example | 7 – 4 |
| Chapter 8 | Introduction | 8 – 1 |
| Turn Lanes | * Classes of Driveways | 8 – 1 |
| | * Mailbox Approaches | 8 – 2 |
| Chapter 9 | | |
| Practice Problems | Volumes & Areas | 9 – 1 |
| Section 2 | Pipe Structures | |
| Chapter 10 | Introduction | 10 – 1 |
| Pipe | * Pipe Types | 10 – 2 |
| Structures | * Pipe End Treatments | 10 – 3 |
| General | * Structure Order | 10 – 4 |
| | Computing Structure Lengths | 10 – 5 |
| | Computing Structure Lengths Using Elbows | 10 – 7 |
| | * Structure Field Layout | 10 – 8 |
| | Staking Structures | 10 – 8 |
| | Normal Layout | 10 – 9 |
| | Laser Layout | 10 – 9 |
| | Checking Grade | 10 – 9 |
| | Batterboard | 10 – 10 |
| | * Laser Grade Control | 10 – 10 |
| | * Basis of Use for Pipe Materials | 10 – 11 |
| Chapter 11 | Introduction | 11 – 1 |
| Pipe Placement | * Laying Pipe | 11 – 3 |
| | * Joining Pipe | 11 – 4 |
| | * Stub-Tee Connections | 11 – 4 |
| | * Pipe End Treatments | 11 – 4 |

| | | |
|---------------------------|---|---------|
| Chapter 12 | * Pipes | 12 - 1 |
| Measurements | * Tees or Wyes | 12 - 1 |
| Of Pipe Items | * Elbows | 12 - 1 |
| | * Others | 12 - 1 |
| Chapter 13 | Introduction | 13 - 1 |
| Manholes, | * Methods of Construction | 13 - 1 |
| Inlets, and | * Grade Adjustments to Existing Structures | 13 - 3 |
| Catch Basins | * Payment of Manholes, Inlets, & Catch Basins | 13 - 4 |
| Chapter 14 | * Backfill Limits | 14 - 1 |
| Pipe and Structure | * Backfill Methods | 14 - 1 |
| Backfill | * Backfill Placement | 14 - 2 |
| | * Payment for Structure Backfill | 14 - 4 |
| | * Sample Problem | 14 - 4 |
| Chapter 15 | Introduction | 15 - 1 |
| Relining | * Liner | 15 - 2 |
| Existing Pipe | * Materials | 15 - 2 |
| Structures | * Equipment | 15 - 4 |
| | * Construction Requirements | 15 - 5 |
| | * Method of Measurement | 15 - 6 |
| | * Basis of Payment | 15 - 6 |
| | Jacked Pipe | 15 - 7 |
| | * Construction Requirements | 15 - 7 |
| | * Jacking | 15 - 8 |
| | * Boring | 15 - 9 |
| | * Method of Measurement | 15 - 10 |
| | * Basis of Payment | 15 - 10 |
| Chapter 16 | Introduction | 16 - 1 |
| Calculating | * Example: Pipe 90 degrees with roadway | 16 - 1 |
| Pipe Lengths | * Example: Pipe on skew angle | 16 - 2 |
| | * Sample Forms | 16 - 4 |
| Chapter 17 | * Description of Materials | 17 - 1 |
| Multi-Plate | * Bolts | 17 - 2 |
| Pipe | * Plates | 17 - 2 |
| | * Plate Identification and Location | 17 - 3 |
| | * Typical Barrel End Views | 17 - 4 |
| | * Pipe-Arch Assembly | 17 - 4 |
| | * Bolting | 17 - 5 |
| Appendix | * Structure Book Example (Str. # 39) | A - 1 |
| | Pipe Perpendicular to roadway | |
| | * Structure Book Example (Str # 59) | A - 3 |

| | |
|--|--------|
| Pipe Parallel to roadway | |
| * Sample Lab Report for Pipe (TD-392) | A – 5 |
| * Sample Lab Report for Reinforced Concrete Pipe | A – 6 |
| * Sample Lab Report for Inlets | A – 7 |
| * ASTM C 403, Penetration Resistance | A - 8 |
| * Standard Sheet E 715-BKFL-01 thru E 715-BKFL-09 | A – 16 |
| * Standard Sheet E 715-PIPE-02 | A – 25 |
| * ITM No. 213-00T | A - 26 |
